Yoni Libman

058-581-9191 | libman.yoni@gmail.com | LinkedIn | GitHub

Professional Summary

Computer Science graduate with hands-on experience delivering independent and collaborative software projects. Combines project ownership, AI-assisted development, practical problem-solving, and a background in software testing. Eager to learn new technologies, take on technical challenges, and grow as part of a professional development team.

Professional Experience

QA Tester | uTest **Feb 2022 – Jun 2022**
Remote | Crowdsourced Software Testing

- Conducted manual functional and exploratory testing of web applications, identifying usability and functional defects.
- Documented issues with reproduction steps, screenshots, and supporting evidence to facilitate resolution.

Technical Projects

Critical HIT **2026**
Independent Project | Next.js, React, TypeScript, Firebase
GitHub | Live Demo

- Designed, developed, and deployed a collaborative Dungeons & Dragons combat management web application using Next.js, React, TypeScript, and Firebase.
- Implemented campaign invitations, real-time initiative tracking, turn management, and automated combat mechanics, including condition durations and concentration checks.
- Integrated Google authentication and Cloud Firestore to support user authentication and real-time data synchronization across campaigns.

Clinical EmotiSupport **2025**
Three-Person Team | Python, NLP, Bio-ClinicalBERT
GitHub | Hugging Face Model

- Collaborated on a multi-label NLP system for identifying emotions in telemedicine messages using a Bio-ClinicalBERT-based model.
- Applied adaptive classification thresholds and evaluated performance, achieving a Micro F1 score of 0.84 on the project test dataset.

Cost Manager Frontend **2025**
Three-Person Team | React, JavaScript, Material UI, IndexedDB
GitHub | Live Demo

- Collaborated on a React expense management application featuring transaction tracking, monthly reports, and interactive charts.
- Implemented client-side data persistence using IndexedDB and integrated currency conversion functionality.

Education

Holon Institute of Technology (HIT) **Aug 2026**
B.Sc. in Computer Science Israel

Technical Skills

Languages & Web: TypeScript, JavaScript, Python, C, SQL, HTML, CSS

Frameworks & Technologies: React, Next.js, Firebase, Material UI, IndexedDB, Chart.js, Bio-ClinicalBERT

Developer Tools: Git, GitHub

AI-Assisted Development: OpenAI Codex, Claude, GitHub Copilot, DeepSeek

Languages

Hebrew (Native) | English (Fluent) | Russian (Fluent)
